

SPECIAL CONDITIONS OF HIRE

POWER GENERATION

When the Equipment hired by a Customer from Onsite is a Power Generator, these additional Special Conditions of Hire also apply to the Hire Agreement, in addition to the Terms and Conditions of Hire. The definitions contained in the Terms and Conditions of Hire apply to these Special Conditions unless expressly stated otherwise:

- 1.1 The Customer will be responsible for the cost of any crane hire if required for the installation and delivery of any Power Generator.
- 1.2 Unless Onsite is responsible for the installation of the Power Generator, the Customer is responsible for arranging the connection, maintenance and disconnection of the Power Generator by a qualified electrical contractor who will undertake the works strictly in accordance with the applicable State or Territory laws and regulations.
- 1.3 The Customer is responsible at its expenses for arranging the inspection or reinspection of the Power Generators by the applicable electrical safety authority, when required.
- 1.4 Where Onsite must maintain and/or service the Power Generator, the Customer will grant reasonable access to Onsite during business hours and will be liable for any additional expenses of Onsite if access is not granted.
- 1.5 Unless expressly provided otherwise, Onsite makes no warranties about the ability of the Power Generator to provide constant, uninterrupted power supply. The Customer is responsible for ensuring the Customer has a contingency power supply in place on site in the event that the Power Generator fails. The Customer will be liable and indemnify Onsite against all Claims arising as a result of the Customer's hire of the Power Generator and the Customer's failure to implement a contingency power supply.
- 1.6 If there is any conflict between Onsite's Terms and Conditions Hire and these Special Conditions of Hire, then these Special Conditions of Hire will prevail to the extent of any conflict.
