

# Onsite Ontrak<sup>®</sup>

Giving you the power to keep your hire equipment on track.

# Onsite Ontrak<sup>®</sup>

Introducing Ontrak<sup>®</sup>. An industry-leading cloud-based worksite management solution to help you remotely monitor, manage, and make the most of your on-hire equipment. All in real time, all via your mobile phone. Ontrak<sup>®</sup> is an efficient, transparent and safer way to work.

## USING TELEMETRY TECHNOLOGY, ONTRAK<sup>®</sup> ENABLES YOU TO:

- 24/7 access to all equipment location
- identify where equipment is, with 4 map-view options
- monitor all equipment usage
- view location by asset number
- improve cost controls
- improve efficiencies
- track historical assets by date and time

## WITH ONTRAK<sup>®</sup> YOU CAN ENHANCE:

### Transparency

- compile daily data and utilisation as a percentage over a defined period
- check daily unused hire equipment by percentage
- check unused equipment cost
- check current fuel levels

### Safety

- identify if equipment is being used inside restricted zones
- know where your hire equipment is – or, more importantly, where it shouldn't be

### Control

- decrease duplication of equipment on site
- have the ability to transfer equipment between sites
- check expiring purchase orders
- check all equipment that exceeded expected off-hire date

## ENHANCED ALERTS

We're also enhancing our Ontrak<sup>®</sup> features, which means you'll soon be able to receive:

- geofence alerts and notifications when you've gone over or under your equipment utilisation
- past expected off hire date
- expiring purchase orders
