

Easy-to-read color TFT LCD display provides not only real time information and error codes for the truck through a CAN bus system but also controls various functions to optimize the truck for the operator's demands.

Just simply opening the two-pieced rear hood, assisted by a gas spring, allows quick and easy access to engine, transmission, radiator and air cleaner for daily checks and maintenance.

Centralized automobile type fuse and relay box for easy checking and maintenance.

Clark's adjustable full suspension seat lessens the operator's fatigue during long hours of operation.

Spacious operator's compartment provides ample head and leg room for a variety of driver sizes.

38 degree tilting steering column, spacious console, large sized low effort pedals and an automobile type parking brake lever have been taken into consideration for convenience.

Easy and safe entry and exit is available by **2 stage low foot steps**.

And various tools can be stored in large **tool box**.

Fork tips are always detectable due to the **lowered cowl**.

High located pre-cleaner plus a large capacity air cleaner constantly supply clean air into the engine to maximize efficiency and protect the engine.

Unbeatable mast performance

Clark designed mast rail are nested, interlocked with sealed and canted rollers to minimize deflection. Shaft-mount carriages have six rail rollers and two side thrust rollers to protect against unbalanced loads. Hydraulic cushioning valves provides silent staging of the rails during lifting and lowering. New design 3 stage mast structure with twin primary cylinders located beside each mast rail, instead of at the center, removes an obstruction from the operator's view.

Safety

- Engine automatically shuts down in the case of excessive engine coolant, or transmission oil temperatures, or low engine oil pressure.
- Ignition only in neutral shift position
- Anti restart
- If parking brake not applied after key is off, warning buzzer sounds.
- If the operator leaves the seat, engine automatically will shutdown. (Optional)

Gen2 series

(C60D, C70D, C80D)
