

## Big Blockout Barrier

The Big Blockout Barrier offers the ultimate durable water-filled barrier for any non-crash tested applications. The barriers can be used internally on work sites to delineate pedestrian areas or separate plant & people in low speed offline traffic areas, for road closures, or to protect internal worksite hazards. Create the perfect exclusion by using the Big Blockout for any no go zone area that does not require a crash tested barrier.

# Big Blockout Barrier

Australian designed and manufactured durable water-filled barrier

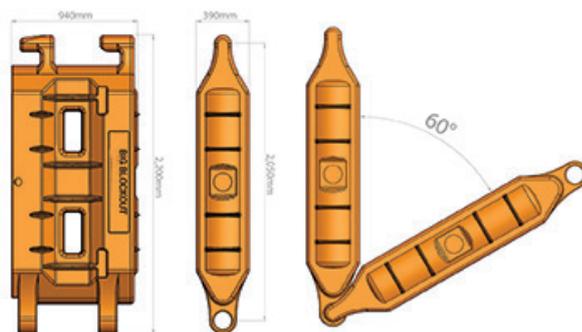

## FEATURES

- Extra durable, robust, virtually indestructible!
